DEV FILES

File Name	🔍 Purpose
.env	Stores secret keys & environment variables. 🔒 Never upload to GitHub.
.gitignore	Tells Git which files to ignore. Common: node_modules, .env, .DS_Store. ❌
package-lock.json	Locks exact package versions. Ensures consistency across machines. 📦
.nvmrc	Sets the Node.js version. Keeps team in sync. 🔢
.editorconfig	Maintains consistent formatting across editors. ✍️
.eslintrc	Linting rules for JS/TS. Helps avoid messy code. 🧹
.prettierrc	Formatter settings for auto-styling code. 🎨
tailwind.config.js	Customize Tailwind with your own colors, spacing, etc. 🌀
tsconfig.json	Configures how TypeScript compiles your code. 💡
.babelrc	Sets up Babel for backward compatibility in JS. 🕰️
.huskyrc	Hooks for pre-commit/pre-push checks. 🐶 Prevent bad code from pushing.
.dockerignore	Tells Docker which files to skip copying into the image. 🐋
vite.config.js	Vite project build & dev server config. ⚡ Fast builds.
next.config.js	Controls behavior of Next.js app. SSR, rewrites, redirects, etc. 🚀
.prettierignore	Tells Prettier what files to skip formatting. 🙈
